

Windamere recently made the switch to Purina Equine products for all 50 horses under their care. With so many individually unique diets and requirements for each horse, Sue and Rachel Schnurr were looking to streamline their feeding processes while making calculated adjustments to the ration balancing. With these updates to the diets they have seen dramatic positive changes to the appearance, performance and the demeanor of each horse.

**"I've noticed a huge positive change in their bodies. Even my massager has noticed a difference"**  
**- Rachel Schnurr**

**"The most important change has been to their bodies. No more hay bellies. The feed is much more digestable"**  
**- Sue Schnurr**

The use of Xcel HD, Equilizer, Optimal and Integri-T products has made all the difference for the horses at Windamere. Sue and Rachel have put their trust in Leis Feed & Supply to help balance their feeding program and deliver the products they need.
